

'Cannot Verify Server Identity' by

iPhone 'Cannot Verify Server Identity'

- ❖ Ensure that your phone is up-to-date.
- ❖ Reset the network settings on your device
 - Settings
 - General
 - Reset
 - Reset Network Settings
- ❖ Re-Start your device

If you're still experiencing the warning message, please follow these steps in your iPhone settings:

1. Click on Settings
2. Click on Mail
3. Click on Accounts
4. Select the effected Email Account
5. Click on your Account again (under IMAP)
6. Scroll to the bottom and click on Advanced
7. Scroll to the bottom and under Incoming Settings and turn off the 'Use SSL' option
8. Make sure Authentication is set to Password
9. Click on back (top left)
10. Then click done (top right)

This should automatically run through the verification and stop the unnecessary warning messages.

If you have any further issues, please do not hesitate to [contact us](#).
